**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Meeting Agenda

Introduction to Behavioral Health Transformation

Current Substance Use Disorder (SUD) Services County Funding

Integrating SUD in BHSA

Assertive Field-Based Initiation for SUD Treatment Services Update

Resources

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Behavioral Health Transformation

DHCS

Behavioral Health Transformation

In March, California voters passed Proposition 1, a two-bill package to modernize the state's behavioral health care system, including substantial investment in housing for people with behavioral health care needs.

Behavioral Health Services Act

» Reforming behavioral health care funding to provide services to those with the most serious mental illness & to treat substance use disorders.

» Expanding the behavioral health workforce to reflect and connect with California's diverse population.

» Focusing on outcomes, accountability, and equity.

Behavioral Health Bond

» Funding behavioral health treatment beds, supportive housing, and community sites.

» Directing funding for housing for veterans with behavioral health needs.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Behavioral Health Transformation Milestones

Below are high-level timeframes for several milestones that will inform requirements and resources. Additional updates on timelines and policy will follow throughout the project.

Started Spring 2024

Stakeholder Engagement

Stakeholder engagement including, **public listening sessions,** will be utilized through all milestones to inform policy creation.

Started Summer 2024

Bond BHCIP: Round 1 Launch Ready

Requests for Applications (RFA) for up to $3.3 billion in funding will leverage BHCIP.

Beginning Early 2025

Integrated Plan Guidance and Policy

Policy and guidance will be **released in phases** beginning with policy and guidance for integrated plans.

Summer 2026

Integrated Plan

New integrated plans, fiscal transparency, and data **reporting requirements** go-live in July 2026 (for next three-year cycle)

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Behavioral Health Bond

- **Behavioral Health Bond** provides **$6.38 billion**, with up to **$4.4 billion** for competitive grants for counties, cities, tribal entities, nonprofit entities, and the private sector toward **behavioral health treatment settings**.
- Of the **$4.4 billion** available for treatment sites, $1.5 billion, with $30 million set aside for tribes, will be awarded through competitive grants **exclusively** to counties, cities, and tribal entities.
- Funds will be distributed through the current **Behavioral Health Continuum Infrastructure Program (BHCIP).**

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Current Substance Use Disorder Services County Funding

DHCS

Current County SUD Funding Sources

- County behavioral health departments receive state, federal and other sources of funding to provide Substance Use Disorder (SUD) services at the local level.
- Each funding source has different requirements counties must follow including:
  - Eligibility of individuals served
  - Allowable expenses
  - Timeframes for expenditure
  - Application and reporting requirements
- Counties utilize the different funding sources to 'braid' funding to meet the needs of individuals at the local level.

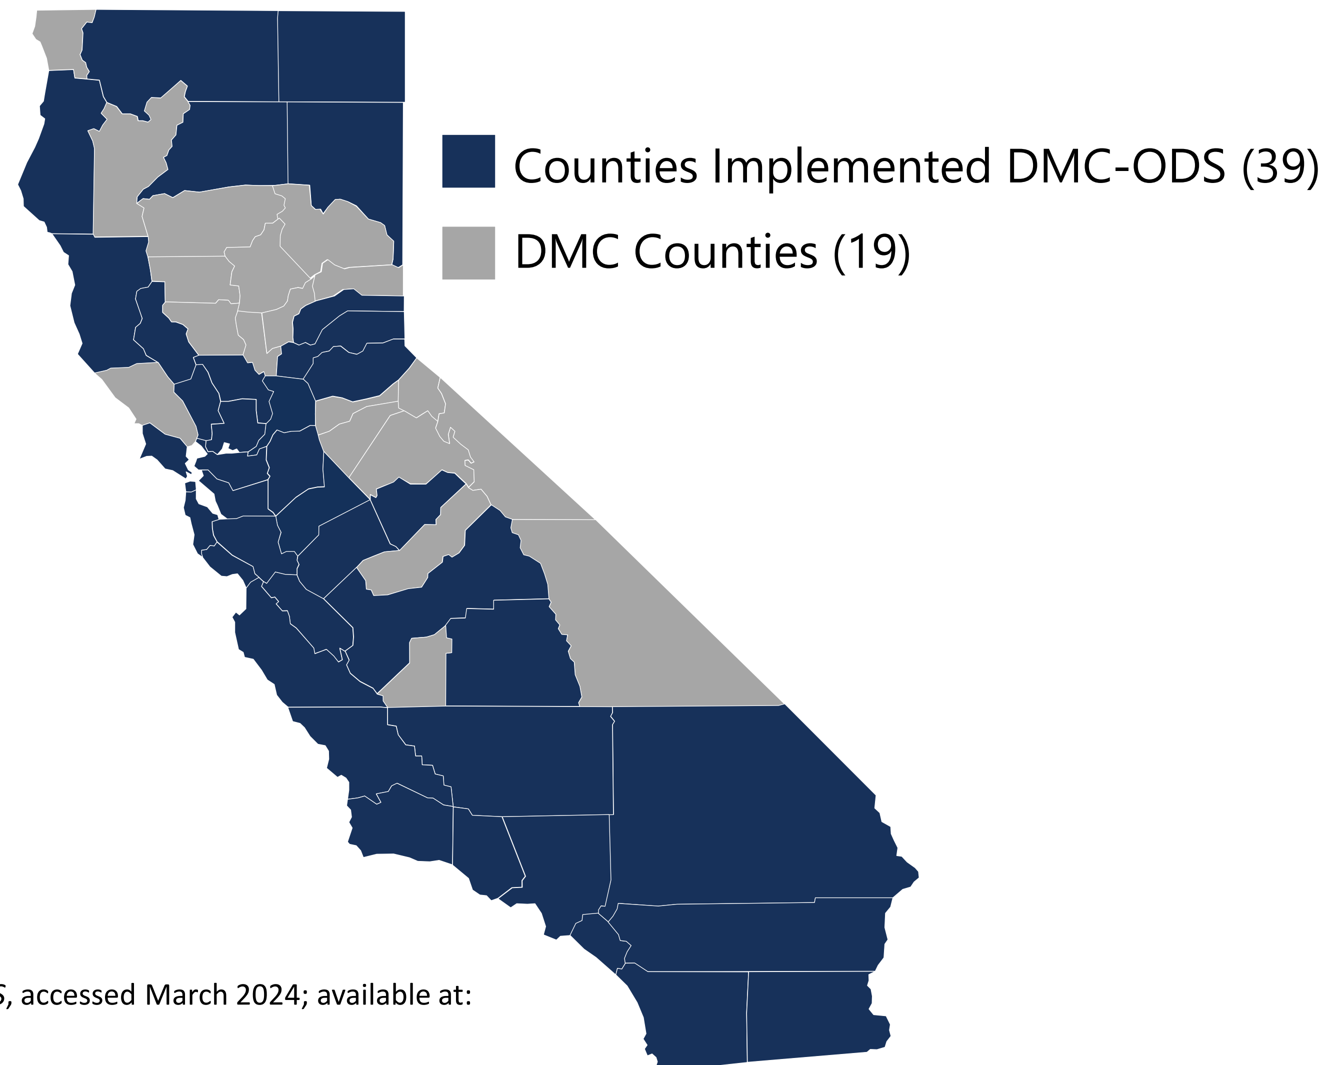
**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Drug Medi-Cal

» Drug Medi-Cal provides SUD treatment services for Medi-Cal members and is administered by California counties.

» Most Californians live in a county that has chosen to operate an expanded program, known as the Drug Medi-Cal Organized Delivery System (DMC-ODS). They operate as a managed care plan for SUD services.

» DMC-ODS counties support more than **96%** of the State's Medi-Cal population.



Source: California Department of Health Care Services, *Counties Participating in DMC-ODS*, accessed March 2024; available at: https://www.dhcs.ca.gov/provgovpart/Pages/county-implementation-plans.aspx.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Drug Medi-Cal Organized Delivery System

The Drug Medi-Cal Organized Delivery System (DMC-ODS) is a program for the organized delivery of SUD treatment services by providing a continuum of care modeled after the American Society of Addiction Medicine (ASAM) Criteria for SUD treatment services.

DMC Benefits

- Outpatient treatment services
- Intensive outpatient treatment services
- Medications for addiction treatment
- Narcotic treatment programs
- Perinatal and youth residential
- Peer support services*
- Mobile crisis services
- Early intervention (youth under 21 years)

All DMC and DMC-ODS services are covered pursuant to EPSDT.

DMC-ODS Benefits

- Outpatient treatment services
- Intensive outpatient treatment services
- Medications for addiction treatment
- Narcotic treatment programs
- Residential – all populations
- Peer support services*
- Mobile crisis services
- Early intervention (youth under 21 years)
- Withdrawal management
- Recovery support services
- Care coordination
- Clinician consultation
- Partial hospitalization*
- Recovery Incentives*
- Inpatient treatment/withdrawal management

* Optional services

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Opioid Settlement

The table illustrates funding and uses resulting from opioid settlements and bankruptcies.

Fund Type	Allocation	Allowable Uses
Settlement Funds		
California Abatement Accounts Fund (70%)	All Participating Subdivisions	Future Opioid Remediation (in one or more of the areas described in Exhibit E of the Settlement Agreements)
		High Impact Abatement Activities (No less than 50% of funds)
California Subdivision Fund (15%)	Cities and counties from Initial Plaintiff Subdivisions	Future Opioid Remediation Reimburse past opioid-related expenses (i.e., litigation fees)
California State Fund (15%)	State of California	Future Opioid Remediation
Bankruptcy Funds		
Local Government Share (60%)	All participating cities and counties	Future Opioid Remediation (in one or more of the uses listed in Exhibit 4 of the Mallinckrodt Bankruptcy Plan)
State Share (40%)	State of California	Future Opioid Remediation

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUBG)

- California's annual SUBG allocation from the Substance Abuse and Mental Health Administration to counties is ~$230M, which is allocated based on population size to provide SUD related activities and services.
- To prevent and treat SUDs, the SUBG Program funds prevention, treatment, recovery support, and other services independently or with Medi-Cal funded services.
- The SUBG program includes the following "set-asides" defined by federal statute and state priorities:
  - Discretionary – for programs specific to local needs, funded at the county's discretion (i.e., residential treatment, recovery support services)
  - Perinatal – services for pregnant women and women with dependent children
  - Prevention – for primary prevention services
  - Adolescent/Youth – youth treatment programs

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUBG)

The SUBG program prioritizes programs that provide SUD prevention, treatment, and recovery services, specifically for the following populations and service areas:

- Pregnant women and women with dependent children
- Intravenous drug users
- Tuberculosis services
- Early intervention services for HIV/AIDS
- Primary prevention services

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

2011 Realignment

SB 1020 (Statutes of 2012) created the permanent structure for 2011 Realignment. It codified the Behavioral Health Subaccount, which funds:

- Specialty Mental Health
- **Drug Medi-Cal**
- **Residential perinatal drug services and treatment**
- **Drug court operations**
- Other non-Drug Medi-Cal programs (Government Code Section 30025 (f)(16)(B))
- Allocations of Realignment funds run on a fiscal year of October 1 – September 30. They are monthly allocations to counties from the State Controller's Office.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Integrating SUD in BHSA

DHCS

BHSA Intent Language and SUD

SECTION 1.

- The people of the State of California hereby find and declare all of the following

(b) One in 10 Californians meet the criteria for a **substance use disorder**.

(c) The number of amphetamine-related emergency department (ED) visits increased nearly 50 percent between 2018 and 2020, while the number of non-heroin-related opioid ED visits, including fentanyl ED visits, more than doubled in the same period. Data shows a 121% increase in opioid deaths between 2019 and 2021.

SECTION 2

(b) The time has come to modernize the MHSA to focus funds where they are most needed: expanding services to include treatment for those with **substance use disorders** and ……

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

BHSA Definition of Substance Use Disorder

- »"Substance use disorder means an adult, child, or youth who has at least one diagnosis of a moderate or severe substance use disorder" from the most current version of the Diagnostic and Statistical Manual of Mental Disorders for Substance-Related and Addictive Disorders with the exception of tobacco-related disorders and non-substance-related disorders.

- » "Substance use disorder treatment services" include **harm reduction, treatment**, and **recovery services**, including federal Food and Drug Administration approved **medications**.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Harm Reduction

DHCS is exploring the utilization of the SAMHSA harm reduction definition which includes:

- Connect individuals to overdose education, counseling, and referral to treatment for infectious diseases and SUDs.
- Distribute opioid overdose reversal medications (e.g., naloxone) to individuals at risk of overdose, or to those who are likely to respond to an overdose.
- Lessen harms associated with drug use and related behaviors that increase the risk of infectious diseases, including HIV, viral hepatitis, and bacterial and fungal infections.
- Reduce infectious disease transmission among people who use drugs (including those who inject drugs) by equipping them with sterile supplies, accurate information and facilitating referrals to resources.
- Reduce overdose deaths, promote linkages to care, facilitate co-location of services as part of a comprehensive, integrated approach.
- Reduce stigma associated with substance use and co-occurring disorders

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Recovery Services

DHCS is exploring aligning the BHSA definition of Recovery Services with the Drug Medi-Cal Organized Delivery System (DMC-ODS) definition.

» Effective January 1, 2022, as described in State Plan Amendment 21-0058 and Behavioral Health Information Notices 21-075 and 22-025, Recovery Services include the following service components:

- Assessment
- Care Coordination
- Counseling (individual and group)
- Family Therapy
- Recovery Monitoring
- Relapse Prevention

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

SUD in BHSA

- Counties will utilize data to allocate BHSA funding between mental health and **substance use disorder** treatment services.
- If counties are not utilizing a proportionate amount of BHSA funding to support **substance use disorders** based on the needs identified by the data in the Integrated Plan, the county will demonstrate what other BH funding sources are being utilized to cover SUD services.
- Counties will identify strategies to address **SUD disparities** in their Integrated Plan.
- In counties with **separate** mental health and **SUD departments**, both departments will work together to utilize BHSA funding in line with local data needs and reflected in their single Integrated Plan.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

SUD in BHSA

- Counties can utilize BHSA funding as the match for Drug Medi-Cal and Drug Medi-Cal Organized Delivery System prior to expending BHSA-only funds for **SUD services**. Counties spend ~12% of their total Medi-Cal behavioral health treatment dollars on SUD (i.e., through DMC/DMC-ODS), suggesting a significant opportunity exists to increase access to lifesaving treatment.
- For **SUD services** not covered by Medi-Cal, BHSA funding can be utilized for individuals with moderate to severe conditions.
- BHSA funds can be utilized as the match for federal dollars of DMC and DMC-ODS services.
- DHCS may utilize the SAMHSA Harm Reduction definition as a framework for BHSA.
- DHCS may utilize the DMC-ODS definition for BHSA Recovery Services.

BHSA and SUD Integration

DHCS

SUD and the BHSA Planning Process

Input from various SUD stakeholders is a new requirement in BHSA. The Welfare and Institutions Code (WIC) requires the following:

- Addition of SUD stakeholders into the community planning process as outlined in WIC 5963.03.
- Change of local mental health boards into the behavioral health board by adding the required SUD representatives in WIC 5604.2.
- Additional SUD membership to the Behavioral Health Services Oversight and Accountability Commission (BHSOAC).

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

County Integrated Plan for Behavioral Health Services and Outcomes

	Three-Year County Integrated Plans (IP)
Purpose	Prospective data-driven plan and budget for all county BH services.
Goal	Standardize strategic planning to increase transparency, foster cross-system alignment, reduce disparities, eliminate fragmentation, and promote stakeholder engagement.
Frequency	Developed every three years.
Timing	First due June 30, 2026.

See Welfare and Institutions Code 5963.02 (SB 326 Sec. 109)

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Expanded Focus of Integrated Plan

The expanded scope for the Integrated Plan will support the state in achieving the following goals:

- Collect local and aggregate information on all behavioral health services delivered statewide.
- Increase transparency and accountability in county reporting and ensure counties are efficiently using behavioral health funding.
- Conduct robust data analysis across counties, services, and funding streams and identify gaps in service delivery.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Capturing Behavioral Health Funding

- BHSA requires counties to submit three-year County Integrated Plans for Behavioral Health Services and Outcomes (IP) that outline planned county activities and projected expenditures for all county mental health and **substance use disorder services** funded under the following behavioral health funding streams[1]
  - Bronzan-McCorquodale Act (1991 and 2011 realignment);
  - Medi-Cal behavioral health, including Specialty Mental Health Services, Drug Medi-Cal (DMC), and Drug Medi-Cal Organized Delivery System (DMC-ODS);
  - Federal block grants;
  - Opioid settlement funding; and
  - BHSA.

[1] 5963.02 (c)(1)

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

BHSA Specifications for SUD

Per WIC 5891.5, the programs, services, and support funded with BHSA may include SUD treatment services for children, youth, adults, and older adults.

- Counties providing substance use disorder treatment services **must provide** all forms of federal Food and Drug Administration approved medications **for addiction treatment.**
- Counties may use BHSA funding to assess whether a person has a substance use disorder and **treat** the individual **prior to a diagnosis** of a substance use disorder.
- Counties must include substance use disorder treatment services in the Integrated Plan and/or Annual Update.

The information included in this presentation may be pre-decisional, draft, and subject to change.

BHSA Funding of SUD Services

- Allows funding of SUD services **across all three funding categories**; Housing, Full-Service Partnership and Behavioral Health Services and Supports.
- BHSA enables counties to fund these services alone or in combination with other state and federal funds to support expansion of **SUD services**.
- **SUD** may be included in state-directed responsibilities (e.g. Population-based Prevention overseen by California Depart. of Public Health, Workforce overseen by Dept. of Health Care Access and Information, Innovation Partnership Fund overseen by Behavioral Health Services Oversight and Accountability Commission).

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Behavioral Health Outcomes, Accountability, and Transparency Report (BHOATR)

The BHSA requires counties to submit Behavioral Health Outcomes, Accountability, and Transparency Reports (BHOATRs) to DHCS on an annual basis.

The BHOATR provides information on county implementation of their Integrated Plans, including reporting on actual mental health and **substance use disorder** expenditures and activities undertaken during the reporting period.

DHCS will use county BHOATRs to develop a statewide BHOATR outlining activities and gaps in mental health and **substance use disorder** delivery across California.

State Auditor Report

- The State Auditor shall issue a comprehensive report on the progress and effectiveness of implementation of BHSA by December 31, 2029, and every 3 years thereafter until 2035. All entities with BHSA funding, including DHCS and the counties, will be audited.
- **Shall include:**
  - BHSA policy impact
  - Timeliness of guidance and technical assistance
  - Progress toward goals and outcomes
  - Gaps in service and trends in unmet needs
  - **Inclusion and impact of SUD services and personnel**
  - Effectiveness of reporting
  - Requirements
  - DHCS oversight of plans and reports
  - Coordination and collaboration areas of improvement
  - Recommendations of changes or improvements

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Housing Intervention Component

Per WIC 5830, counties are required to establish and administer a program for housing interventions.

1. Housing interventions to individuals with a **substance use disorder** are allowable for counties. (WIC 5891.5)
2. Housing interventions must not deny access to housing for individuals that are utilizing **medications for addiction treatment** or other authorized medications.
3. Housing interventions must comply with the core components of Housing First principles and may include **recovery housing**.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Behavioral Health Services and Supports Component

Per WIC 5892, thirty-five percent of the funds distributed to counties must be used for Behavioral Health Services and Supports (BHSS).

- Counties may fund under BHSS may include the addition of **substance use disorder services**.
- Early Intervention Programs are designed to prevent mental illnesses **and substance use disorders** from becoming severe and disabling and to reduce disparities in behavioral health.
- Outreach and Engagement activities may be targeted to individuals and communities in **the behavioral health system**
- Workforce Education and Training activities may target the **behavioral health workforce.**

The information included in this presentation may be pre-decisional, draft, and subject to change.

Full Service Partnership Component

Per WIC 5887, each county must establish and administer a full service partnership program.

- The program must include mental health services, supportive services, and **substance use disorder treatment services**, as needed by the individual.
- The program must include **assertive field-based initiation for substance use disorder treatment services,** including the provision of medications for addiction treatment.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Assertive Field-Based Initiation for SUD Treatment Services Update

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Policy Design Principles

Assertive SUD engagement proposes a “no-wrong door” approach to connect more Californians to MAT and follow-up integrated treatment and support.

- **Voluntary participation**, focusing on field-based MAT initiation for individuals who want to be connected to treatment
- **Outreach and engagement to individuals wherever they are**, (e.g., on the street, EDs, in syringe exchange programs, in homeless encampments)
- **Expand low-barrier, rapid access to all forms of MAT** (buprenorphine, methadone, naltrexone) for individuals with opioid use disorder and alcohol use disorder when they ready for treatment using harm reduction principles
- **Link to ongoing comprehensive treatment and supports with FSP, Medi-Cal and other county programs** (e.g., care coordination, primary care, housing and employment supports)
- Provide **flexibility for counties** to respond to local conditions and populations
- **Build upon and expand** existing SUD treatment models and programs within California
- **Maximize available resources**, including Medi-Cal, to most efficiently use BHSA funding

Full Service Partnership Component "Whatever It Takes"

Per WIC 5887, each county must establish and administer a full service partnership program.

- The program must include mental health services, supportive services, and **substance use disorder treatment services**, as needed by the individual.
- The program must include **assertive field-based initiation for substance use disorder treatment services,** including the provision of medications for addiction treatment.

Proposed Definition of Assertive field-based initiation for substance use disorder treatment services

Outreach, engagement, initiation of and connection to treatment for substance use (e.g., alcohol misuse, stimulant misuse, opioid use) disorder including medications for addiction treatment (MAT) in any low-barrier setting, such as on the street, in homeless encampments, and in hospital emergency departments (ED) to reach people wherever they are.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

FSP Integration With SUD

Expectations for BHSA

1. Counties must conduct assertive field-based initiation; and
2. FSP teams must be capable of supporting individuals living with co-occurring mental health and substance use conditions.

NOTE: *SB 326 does not prohibit counties from establishing FSP programs for individuals with primary SUD diagnoses (i.e., without co-occurring significant mental health needs), however, counties are not required to develop new, dedicated Levels of Care specific to SUD, or FSPs that are exclusively for SUD (apart from implementing new, field-based initiation of SUD care requirements). DMC-ODS is intended to cover a comprehensive continuum of care for SUD.*

The information included in this presentation may be pre-decisional, draft, and subject to change.

Deep Dive: Co-Occurring Capabilities

Individuals living with serious behavioral health disorders and co-occurring SUD could be eligible for any FSP Level of Care. FSP teams must be capable of treating individuals with co-occurring needs.

» **Strategies to build on co-occurring capabilities under BHSA:** Enable BHSA eligible individuals living with co-occurring SMI/SED and SUD to receive FSP levels of care, allow (but do not require) SUD only FSP, and require FSP programs to provide access to MAT/SUD treatment, by*:

- **Connecting individuals to FSP teams, as appropriate**, after they receive assertive field-based initiation for SUD treatment services
- **Conducting ASAM screening** as part of integrated assessment upon intake
- **Offering MAT services directly to clients or having an effective referral process in place** (i.e., established relationship with a MAT provider and transportation to appointments for MAT)
- **Equipping FSP program staff** at all levels of care to provide comprehensive care to individuals living with co-occurring SMI/SED and SUD (e.g., training for existing prescribers who are not familiar or comfortable with prescribing MAT)
- Developing strategies for **infrastructure for billing and claiming**

*Strategies to build co-occurring capabilities are an allowable use of FSP funding

**The information included in this presentation may be pre-decisional, draft, and subject to change.*

Assertive Field Based Program Goal

Embrace a **"low barrier" harm-reduction and person-centered model** to prevent overdose and infectious disease transmission, improve the quality of life for and engage individuals with substance use disorder (SUD) in treatment.

Key components of this model include promoting **availability and accessibility** of care, **flexibility** in approach and a **collaborative** and **comprehensive** approach across substance use, mental health, primary care and social supports to address the **complex needs** of individuals with SUD.

**The information included in this presentation may be pre-decisional, draft, and subject to change.*
